PROFESSIONAL SUMMARY

Full-Stack Developer and AI Engineer based in Karachi. I joined Digital Graphiks as an AI Developer Intern and was promoted to full-time AI Developer; I am now the only AI developer in the company, leading all AI-related work and training junior developers on AI tools and workflows. I have built a Laravel CRM with an integrated HRMS and a complete e-commerce admin platform with UAE payment gateway integrations, and I work across Laravel/PHP, Next.js, TypeScript, FastAPI and Python, with a focus on RAG pipelines, MCP-integrated agents and Shopify stores. An earlier background in sales, event coordination and operations sharpened my client communication. Enrolled in the Certified Agentic AI Engineer program at GIAIC.

TECHNICAL SKILLS

AI & Agentic Systems: OpenAI Agents SDK, LangChain, Claude Code, RAG (Retrieval-Augmented Generation), MCP Tools & Servers, Qdrant

Frontend Development: Next.js, React, TypeScript, JavaScript, Tailwind CSS

Backend Development: Laravel, PHP, FastAPI, Python, Node.js, PostgreSQL, MongoDB, REST APIs, JWT, Better Auth

E-commerce: Shopify (Liquid, theme customization), payment gateways (Paymob, Tabby, Tamara, CCAvenue), admin panels and CMS

DevOps & Cloud: Docker, Kubernetes, Vercel, GitHub Actions, AWS

Python & Data Tools: Streamlit, OpenCV, Pandas

Testing & Tooling: Jest, Cypress, Postman

Design: Figma, Photoshop, Illustrator

EXPERIENCE

AI Developer · *Digital Graphiks* *June 2026 – Present*

- Joined as an intern and promoted to full-time; the company's only AI developer, owning all AI-related work and training junior developers
- Built a complete CRM system with an integrated HRMS, including attendance tracking and payroll, using Laravel and PHP
- Built the full admin panel for Formula Tires, a UAE tire e-commerce platform (Laravel admin, Next.js storefront): products, orders, customers, staff roles and permissions, dashboard, and a CMS that controls the entire website
- Integrated UAE payment gateways into the platform: Paymob, Tabby, Tamara and CCAvenue
- Currently building the ERP accounting module, alongside CMS and e-commerce modules
- Lead the team's AI-assisted development workflow using Claude Code

Formula Tires (testing): formula-tires.vercel.app

Freelance Graphic Designer · *Self-Employed* *June 2022 – August 2024*

Delivered logo design, brand identity, and digital graphics for clients across various industries. Maintained ongoing client relationships with a focus on clear communication and creative problem-solving.

PROJECTS

Obraven Apparel — Shopify Store — *Shopify, Liquid, Horizon theme*

Unisex streetwear brand for the UK market. Built the store and customized the Horizon theme for a minimal, premium, editorial look.

Live: obravenapparel.shop

Zain AI FTE — Personal AI Employee (In Progress) — *Claude Code, Python, MCP Servers, Obsidian, Playwright, n8n*

Local-first autonomous AI agent ("Digital FTE") built for the GIAIC Personal AI Employee Hackathon, using Claude Code as its reasoning engine and Obsidian as a knowledge dashboard, with Python watchers and MCP servers driving proactive, human-approved actions.

- Architecture: Perception layer (Watchers) → Obsidian Vault → Claude Code reasoning loop → MCP action layer
- Implements the "Ralph Wiggum" stop-hook pattern to keep the agent iterating until task completion

GitHub: github.com/Zain-Ul-Abideen00/Zain-AI-FTE

Physical AI & Humanoid Robotics Interactive Textbook — *Python, FastAPI, RAG, Qdrant, Gemini API, Docusaurus, Next.js, TypeScript*

Interactive learning platform for a 13-week Physical AI and Humanoid Robotics curriculum, featuring a RAG-powered chatbot that answers questions contextually from the textbook content.

- Agentic backend: FastAPI + Gemini API + Qdrant vector database for semantic retrieval
- Multi-module frontend built with Docusaurus 3.9, MDX, and Mermaid.js diagrams; deployed on Vercel

Live: zain-humanoid-robotics.vercel.app

GitHub: github.com/Zain-Ul-Abideen00/Physical-AI-Humanoid-Robotics-Textbook

AI-Powered Todo App with MCP Chatbot Agent — *Next.js 16, FastAPI, LiteLLM, OpenAI ChatKit, MCP Tools, Docker, Kubernetes*

Full-stack AI task management system built for the GIAIC Q4 Hackathon, with an MCP-integrated chatbot agent enabling natural language task management and autonomous, multi-turn reasoning.

- Agentic chatbot using LiteLLM (Gemini/Groq), OpenAI ChatKit, and custom MCP tool integrations
- Next.js 16 + React 19 frontend; FastAPI + PostgreSQL backend with Better Auth (JWT)

Steplo – E-Commerce Platform — *Next.js, TypeScript, Tailwind CSS, Sanity CMS*

Live: steplo.vercel.app

GitHub: github.com/Zain-Ul-Abideen00/Steplo

Python AI Utility Applications Suite — *Python, Streamlit, OpenCV*

Live: zain-vision.streamlit.app

EDUCATION

Certified Agentic AI Engineer · *GIAIC — Governor's Initiative of AI & Computing* *Feb 2023 – Present*

Formerly "Certified Cloud Applied Generative AI". A rigorous, full-stack AI engineering program covering Agentic AI design, LLMs, RAG pipelines, cloud-native AI deployment, and autonomous agent engineering using the OpenAI Agents SDK and modern AI frameworks.

DAE – Diploma of Associate Engineering (Mechanical) · *Govt Polytechnic Institute, Karachi* *2017 – 2020*

Intermediate – Pre-Engineering · *Aisha Bawany College, Karachi* *2018 – 2020*

Matriculation – Science · *The Innovative Public School, Karachi* *2017*

CERTIFICATES & TRAINING

Digital Marketing · *Saylani Mass IT Training* *August 2023 – December 2024*

- SEO, paid advertising, and social media campaigns
